SEIF AHMED ALMAZ

Data Analyst | Data Science | Business Intelligence

Cairo, Egypt • +20 109 923 7445 • siefalmaz3@gmail.com • linkedin.com/in/seif-almaz • github.com/seifalmaz

PROFESSIONAL SUMMARY

Results-driven Computer Science student (Data Science Major) with hands-on experience delivering end-to-end data solutions across analytics, engineering, and machine learning. Proficient in Python, SQL, Power BI, and Tableau, with practical exposure to ETL pipeline design, data warehousing, and predictive modeling. Proven ability to translate complex datasets into actionable business insights. Eager to contribute analytical depth and technical skill to data-focused roles.

EDUCATION

B.Sc. Computer Science – Data Science Major *2023 – 2027*

Helwan National University, Cairo | GPA: 3.26 / 4.0

WORK EXPERIENCE

Machine Learning Engineer Trainee *Nov 2025 – Jul 2026*

Digital Egypt Pioneers Initiative (DEPI) – Microsoft ML Track

- Completed intensive training in Machine Learning, Deep Learning, NLP, and Computer Vision using Python.
- Designed and optimized supervised and unsupervised ML models with a focus on feature engineering and model evaluation.
- Implemented deep learning architectures incorporating attention mechanisms for NLP tasks.
- Utilized Azure AI services (AI Fundamentals & AI Engineer Associate) alongside MLOps tools including MLflow and Hugging Face for model tracking and deployment.
- Delivered an end-to-end capstone project integrating data pipelines, model training, and performance evaluation.

Data Engineering Intern *Jul 2025 – Aug 2025*

Banque du Caire – IT Department | Cairo, Egypt

- Gained practical experience with ETL workflows using Informatica and SQL within an enterprise banking environment.
- Monitored and maintained data pipelines, resolved SQL-based data quality issues, and optimized XML configurations.
- Collaborated in team brainstorming sessions on data integration strategies and workflow automation improvements.
- Applied data governance best practices across large-scale enterprise IT systems.

Google Data Analyst Specialist Trainee *Oct 2024 – Jun 2025*

Digital Egypt Pioneers Initiative (DEPI) – Google Data Analytics Track

- Led data analytics initiatives to generate strategic business insights and support data-driven decision-making.
- Designed interactive Power BI dashboards (DAX, data modeling) that improved reporting efficiency and operational transparency.
- Automated data workflows using Python and SQL to streamline ETL processes and enhance data accuracy.
- Extracted, transformed, and visualized data using advanced SQL queries and Python scripting (Pandas, NumPy, Matplotlib).

Summer Intern *Jul 2024 – Aug 2024*

CIB – Commercial International Bank (Remote)

- Gained exposure to data literacy, digital transformation, and data-driven decision-making frameworks within a leading financial institution.
- Engaged with senior industry leaders on strategic approaches to digital inclusion and enterprise data governance.

PROJECTS

UK Railway Data Analysis & Business Intelligence | SQL Server · Python · Power BI · Tableau

- Architected a Three-Layer Data Warehouse (Bronze/Silver/Gold) using SQL Server to separate raw ingestion from business-ready analytical layers.
- Engineered end-to-end ETL pipelines and automated data transformation workflows using Python and SQL stored procedures; cleaned and standardized datasets into an optimized Star Schema.

- Developed advanced SQL analytical queries and Python-based time-series forecasting models to measure operational KPIs and predict passenger demand trends.
- Built interactive Power BI and Tableau dashboards visualizing passenger volumes, delay rates, and revenue-generating routes.
- Identified that 2 routes generated 40% of total ticket revenue (£296K combined) and determined that 6 of 65 routes accounted for 75% of all passenger traffic.
- Discovered that Liverpool Lime Street → London Euston caused 34% of all delays due to signal infrastructure failures; proposed strategic recommendations including dynamic pricing and weather alert integration to reduce delays and refund costs.

Spotify Analytics Dashboard | Python · Plotly Dash · Pandas · NumPy

- Developed an interactive analytics dashboard analyzing 54,000+ tracks spanning 2000–2023 using Python and Plotly Dash.
- Performed comprehensive data cleaning, feature engineering, and dataset enrichment — resolving missing release-date issues by integrating external Spotify metadata via track_id-based merging.
- Built interactive visualizations covering genre analysis, popularity trends, audio feature relationships, and time-series music insights, enabling dynamic exploration of large-scale music data.

Waste Classifier – Intelligent Recycling System | PyTorch · Deep Learning · Computer Vision

- Developed an AI-powered waste classification system using Deep Learning to categorize waste images into 5 classes: Plastic, Paper, Metal, Glass, and Organic.
- Designed and benchmarked multiple architectures including CNNs, Transfer Learning models (ResNet50, EfficientNetB3), and Vision Transformers (ViT) to identify the optimal classification approach.
- Executed end-to-end data pipeline including web scraping, duplicate removal via image hashing, and data augmentation; evaluated models using accuracy, precision, recall, F1-score, confusion matrices, Grad-CAM, and attention visualizations.
- Targeted smart recycling efficiency and environmental sustainability through scalable AI-driven image classification.

TECHNICAL SKILLS

Languages & Data: Python (Pandas, NumPy, Matplotlib, Scikit-learn, PyTorch), SQL (Advanced – Joins, CTEs, Window Functions), HTML/CSS/JS (Basic)

Databases & Engineering: SQL Server, Oracle SQL, Cloudera, ETL Pipelines, Data Warehousing, Star Schema Modeling, Data Cleaning, Informatica

Visualization & BI: Power BI (DAX, Data Modeling, Interactive Dashboards), Tableau, Plotly Dash

Machine Learning & AI: Supervised & Unsupervised Learning, Deep Learning (CNNs, ViT, Transfer Learning), NLP, Feature Engineering, XGBoost, LLM Fundamentals

Cloud & MLOps: Microsoft Azure (AI Fundamentals), MLflow, Hugging Face

Languages: Arabic (Native), English (Fluent)

CERTIFICATIONS

- Microsoft Office Specialist: PowerPoint (Office 2016)
- Introduction to Machine Learning – Duke University
- Data Literacy Essentials – SAS
- ALX AiCE – AI Career Essentials

VOLUNTEERING

Programming Mentor – ICPC Community *Feb 2025 – Jul 2025*

HNU Faculty of Computer Science & IT, Helwan National University

- Mentored students in algorithmic problem-solving and competitive programming, covering data structures, algorithms, and contest strategies.
- Conducted structured training sessions to prepare students for ECPC, ACPC, and ICPC competitions.
- Enhanced students' analytical thinking and coding efficiency through hands-on practice and simulated contest environments.
